

PRESENTATION EXCELLENCE: VOCAL MASTERY

Watch the video with your team.

Now have the team write down on a number of sticky notes a variety of situations with the following information on each:

One sentence describing the **situation**

The **audience** to whom the message is being delivered

The **intention** that needs to be conveyed in this situation.

Place all these sticky notes in a hat or a container. Now, have each team member pick one sticky note at random.

Give the entire team 5 minutes to prepare a role-play communication, in the context of the situation, adapting the 5 elements of Vocal Mastery mentioned in the video.

Each team member then has up to 1-minute to present their roleplay.

After each team member's presentation, ask the others to give feedback as to how this presentation could have been improved by some adaptation of the 5 elements.

The debrief can take stock of the different feedback and summarize what are the improvement areas that were cited the most.

Thank everyone for their participation
